6:00-7:00pm, online via Zoom

Making your cup count: how coffee can fuel migratory bird conservation

We hope you'll join us for this very special presentation by Dr. Rodewald from the Cornell Lab of Ornithology! While we are unable to have our traditional in-person Feast in the Forest fund-raiser, we are thrilled to have such an esteemed guest as our featured speaker for this online fund-raising event!

Many of the planet's biodiversity hotspots face widespread deforestation, land degradation, and poverty, and, as such, require creative ways to sustain species, protect ecosystem services, and support human health and well-being. Shade-grown coffee farms are well-suited to simultaneously meet social and ecological needs. When coffee is grown under trees, farms can supply a variety of products (e.g., coffee, fruits, firewood, lumber, and medicines) while at the same time provide forest cover, support diverse species assemblages, and reduce erosion and chemical use compared to other intensive agricultural systems. Perhaps no other group better highlights the positive role that shade-grown coffee can play in conservation than neotropical migratory birds, which heavily use shade-coffee farms. Unfortunately, traditional shade management has given way to intensive "sun coffee" monocultures. In her talk, Dr. Rodewald will discuss how shade-coffee and other agroforestry practices can support bird conservation, healthy ecosystems, and human communities in Latin America.

Amanda D. Rodewald is the Garvin Professor and Senior Director of the Center for Avian Population Studies at the

Cornell Lab of Ornithology and the Department of Natural Resources and the Environment at Cornell University. Prior to joining the Cornell faculty in 2013, she spent 13 years as a professor at The Ohio State University. Amanda received a B.S. in Wildlife Biology from University of Montana, an M.S. in Zoology from University of Arkansas, and a Ph.D. in Ecology from Pennsylvania State University. She is a fellow of the American Association for the Advancement of Science and the American Ornithological Society, among others. Dr. Rodewald directs an interdisciplinary, international research program in ecological and sustainability sciences that seeks to identify conservation strategies that support both people and the environment. She has published more than 165 scientific papers, 9 book chapters, and 60 popular articles for broad audiences, and she consistently engages with managers, decision-makers, community members, and private sector partners. Dr. Rodewald also supports science-based decision-making and policy by serving on advisory boards including the Science Advisory Board of US EPA, delivering briefings and testifying to Congressional leaders and staffers, testifying to Congress, and writing for policy-focused outlets such as *The Hill*.

November Program Meeting
**Reproductive Ecology of the White-headed Woodpecker in
Washington's Ponderosa Pine Forests**

Guest Speaker: Jeff Kozma

When:

November 12, 2021 at 7:00 PM

Where:

Online

Register for Meeting:

<https://us02web.zoom.us/j/84461212693>
[register/tZctf-
Guqz4jGd30y2VxNNrZKx4I98emwAeV](https://us02web.zoom.us/j/84461212693)

In Washington, the White-headed Woodpecker is listed as a species of concern due to its association with old-growth ponderosa pine forests. Although White-headed Woodpeckers have recently been documented inhabiting early to mid-seral managed forests, information is limited regarding their reproductive success and general ecology in these forests.

For the last 18 years, Jeff Kozma, a wildlife biologist for the Yakama Nation, has been studying the ecology of White-headed Woodpeckers in managed ponderosa pine forests of the eastern Cascades. Jeff will present highlights from his research including nest-site characteristics, reproductive success, and nestling provisioning (i.e., who feeds the kids and what are they feeding them).

He will also present a brief summary of findings from a project conducted by Teresa Lorenz, a graduate student at the University of Idaho, who investigated home range size and habitat use by White-headed Woodpeckers using radio telemetry and also preliminary results from a long-

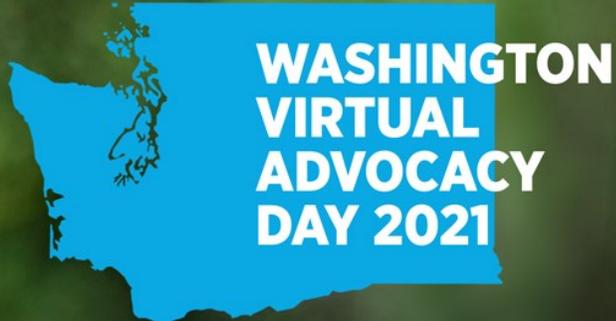

term banding study investigating adult longevity he has been conducting since 2011. We hope you can make it to learn more about this iconic species of our ponderosa pine forests.

Jeff received his B.S. Degree in Environmental Forest Biology from the College of Environmental Science and Forestry at Syracuse. He later received his M.S. Degree in Wildlife Science at Texas Tech University, where he studied the use of Chihuahuan Desert arroyos and adjacent uplands by migrant and breeding birds in southern New Mexico.

After graduating, he began working as a wildlife biologist at the Yakima Training Center, where he monitored Sage Grouse, did raptor and non-game bird surveys, and was involved with restoration of seeps, springs, and riparian areas. He is currently working as a wildlife biologist for the Yakama Nation, where he has been studying the reproductive biology of White-headed Woodpeckers and other cavity-nesting birds in managed forests for the last 18 years. 🦉

Speak Up For Birds!

Virtual Advocacy Day | December 7, 2021

Belted Kingfisher
photo by OHFalcon 72

Learn how to meet with your legislator!

We need your help to pass policies that benefit birds and people. When you register, you'll join an advocacy group to meet with your state legislator on December 7th. Audubon will schedule your group's meeting and provide training to ensure you're prepared to speak for the birds!

Learn more and register
 birdsscan.win

Two things you can do for birds this fall

Birds can't vote, and they can't tell legislators what they need to survive.

But you can.

On December 7, we'll be hosting our second annual *Virtual Advocacy Day*, providing birders across the state an opportunity to connect with their state legislators about Audubon Washington's 2022 legislative agenda.

There are two things I'd like to ask you to do this fall to help Washington's birds:

- 1) [Register](#) to attend advocacy day and share [the registration page](#) with your chapter network.
- 2) [Sign up to be a district leader](#) – work with state office staff to help facilitate lobby meetings with key state legislators in your chapter's territory.

We'll be providing a special training session to help you feel comfortable in this role (total time commitment: 10-15 hours between now and mid-December).

Last year we had 80+ Audubon members meeting with 25 legislators. We'd love to build on that success this year.

Thank you for all you do,

Adam Maxwell

All About Christmas Bird Counts with Elaine Chuang and Brian Zinke

Free, Online Program

Hosted by the Everett Public Library

The [Audubon Christmas Bird Count](#), or CBC, began on Christmas Day 1900 as an alternative to the current tradition at the time: a Christmas bird hunt. Instead of shooting them, enthusiasts began trying to count as many birds as possible. Ever since, information collected on the many different bird species found in North America has been vital to scientists in assessing the health of and trends in bird populations. More than half of the 588 North American bird species are in trouble from loss of habitat, climate change, and many other factors. The CBC is an excellent example of the importance of Community Science. By signing up to participate in a local count, you can help identify what actions need to be taken to protect birds and their habitats.

Christmas Bird Counts take place annually all over North America between December 14 and January 5, and here in Washington State, for example, there were 40 held in 2020. [Pilchuck Audubon Society](#) sponsors two CBCs in

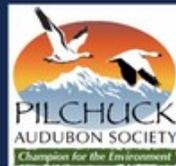

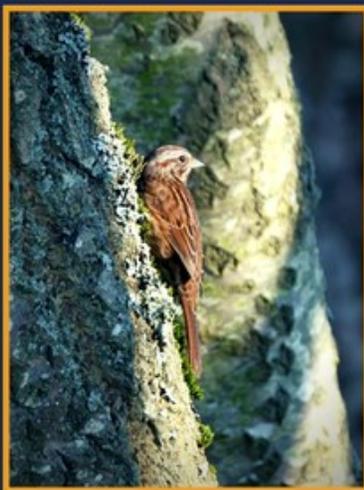

Snohomish County. The Edmonds/South County count will be on December 18 and the Everett/Marysville count will be on January 1. To learn more about our local counts and to sign up, please visit: <https://www.pilchuckaudubon.org/christmas-bird-count>.

Elaine Chuang is an avid participant in Community Science efforts across our region, volunteering at the drop of a hat with birding and environmental education programs such as Seattle Parks and Recreation, Pilchuck Audubon, Seattle Audubon, the Washington Ornithological Society, Puget Sound Bird Observatory, and the Woodland Park Zoo. She is a graduate of Seattle Audubon's Master Birder Class (2019).

Brian Zinke is the Executive Director for the Pilchuck Audubon Society. He's a certified Associate Wildlife Biologist®, and has worked to conserve several endangered species in Washington, Wyoming, and Kansas. 🍀

Birder Wins Statewide Honor

Contributed by *Skagit Valley Herald* reporter Kimberly Cauvel

Skagit Audubon member Tim Manns received the Helen Engle Volunteer of the Year award for 2021 from Audubon Washington, a high honor in the name of hardworking local, state, and National Audubon member Helen Engle and her many conservation accomplishments prior to her death in 2019.

"It's definitely an honor. I'm really touched," Tim told the *Skagit Valley Herald*.

As a long-time Skagit Audubon member, Tim has taken on numerous roles to monitor, protect, and educate others about the region's myriad bird species, from the hard-to-miss Great Blue Heron and Trumpeter Swan to more flighty songbirds, like the towhee of special significance to Helen. Tim said each species is unique and can inspire broader conservation values.

"Every bird, if you see it well, like through binoculars—they are exquisitely beautiful," he told the *Skagit Valley Herald*.

Audubon Washington Vice President and Executive Director Deborah Jensen said Tim's investment in his local chapter, as well as with other conservation organizations and volunteer science programs in the area, is what earned him the award, which comes with a "quirky" year-long trophy of sorts.

See the full story at: https://www.goskagit.com/news/environment/skagit-valley-birder-wins-statewide-honor/article_3dbec139-0ef7-52b3-9d6c-bc938777b9cc.html (might need two clicks). 🐦

BIRDING FIELD TRIPS

TRIP CALENDAR

Check our website, <https://>

www.pilchuckaudubon.org/upcoming-trips, for the latest information.

Tuesday, November 2 Silvana Roads

Meet at 8:00 a.m. at Quilceda Village Walmart parking lot west of Marysville (I-5 exit 200). Park away from the store, to the east, near Quilceda Blvd (next to I-5). We will explore the Stillaguamish Valley roads between Silvana and Stanwood, looking for wintering geese, swans, ducks, and raptors, perhaps also a Northern Shrike. A walk at the Port Susan Bay Conservancy is a possibility. Trip Leader: Virginia Clark, 360-435-3750.

Sunday, November 7 Renton—Gene Coulon Memorial Beach Park

Meet at Lowe's Home Improvement, 1000 Garden Ave N in Renton, due to the possibility of limited parking. It is about three blocks from the park entrance. Exit I-405 at Southport Dr/Sunset Bl. Turn west downhill. Take a left at the light Garden Ave. Park on the west alongside Garden Ave. Bring fowl weather gear, sturdy walking boots, water, snacks for yourself. Also bring binoculars and a field guide if you have them. Optionally, we might reconvene afterward for a little socializing over lunch at nearby café. Please submit the [liability waiver](#)/COVID acknowledgment to director@pilchuckaudubon.org. I will have blank forms if necessary. No dogs. Open to all who are vaccinated. Trip Leader: Jonathan Blubaugh, 425-244-7633, aracfi@msn.com.

Tuesday, November 9 Blaine and Birch Bay

Meet at 7:30 a.m. at Quilceda Village Walmart parking lot west of Marysville (I-5 exit 200). Park away from the store, to the east, near Quilceda Blvd (next to I-5). Checking Blaine Harbor and Semiahmoo for Long-tailed Ducks, White-wing Scoters, Black Turnstones, Harlequin Ducks, and more always is a treat, plus stops at Birch Bay and other hotspots. Pack a lunch. Trip Leader: Virginia Clark, 360-435-3750.

Tuesday, November 16 Fir Island

Meet at 8:00 a.m. at Quilceda Village Walmart parking lot west of Marysville (I-5 exit 200). Park away from the store, to the east, near Quilceda Blvd (next to I-5). We will explore the roads of the Skagit Valley from the Cedardale area west across I-5 with stops at Wylie Slough and Hayton

Reserve, looking again for winter raptors, waterfowl, and songbirds. Pack a lunch. Trip Leader: Virginia Clark, 360-435-3750.

Tuesday, November 30 Anacortes

Meet at 7:30 a.m. at Quilceda Village Walmart parking lot west of Marysville (I-5 exit 200). Park away from the store, to the east, near Quilceda Blvd (next to I-5). Washington Park offers great opportunities to see loons, alcids, and Harlequin Ducks. Other possible stops include March Point, Cap Sante Park, and Rosario Beach. Pack a lunch. Trip Leader: Virginia Clark, 360-435-3750. 🦅

Field Trip Restrictions

For those who are unvaccinated for COVID-19, we will not be able to accommodate your attendance on field trips at this time.

For those who are vaccinated:

- Masks are not needed while outdoors.
- Carpooling with individuals from outside of your house is allowed, but masks should be worn while in the vehicle.
- Maintaining 6 feet of distance between participants is highly encouraged.
- Sharing equipment is discouraged.

[Please read the full guidelines for participating in field trips here.](#) You will be required to sign an annual [liability waiver](#) and acknowledge that you agree to abide by the COVID guidelines before participating in a field trip.

If you have any questions regarding field trips or the current guidelines, please contact Brian Zinke at director@pilchuckaudubon.org. 🦅

Looks like we are headed for a very cold and wet winter. The number of bird species has already declined and the Dark-eyed Junco is back.

Carole and Larry Beason's report from Lake Bosworth included 24+ American Robin, 6 Anna's Hummingbird, a Bald Eagle flying over the lake, a Belted Kingfisher on the deck, 20 Canada Goose over the lake, a Common Raven, 8 Dark-eyed Junco, a Great Blue Heron, 2 Hairy Woodpecker, 5 Mallard Duck on the lake, 7 Mourning Dove in the spruce tree, an Osprey over the lake, 26 Pine Siskin on the patio table, a Pileated Woodpecker, 14 Purple Finch, a Red-tailed Hawk, 36+ Red-winged Blackbird, 3 Rufous Hummingbird, 5 Spotted Towhee, a Sharp-shinned Hawk, a Winter Warbler, and 2 Wood Duck on the lake, for a total species count of 33.

Sarah and Paul Bueren's report from their home in Edmonds listed 5 Chestnut-backed Chickadee, 4 Black-capped Chickadee, a Cooper's Hawk, 15 Dark-eyed Junco, 3 Red-breasted Nuthatch, 5 Band-tailed Pigeon, 2 Song Sparrow, 28 Turkey Vulture flying over, 3 Northern Flicker, a Pileated Woodpecker, 5 Bushtit, a Caspian Turn flying over, a Brown Creeper, an Anna's Hummingbird, a Golden-crowned Kinglet, 6 American Crow, a Golden-crowned Sparrow, and a Great Horned Owl in the forest, for a total species count of 23.

Reporting from Mukilteo, Hilka Egtvedt reported a Red-tailed Hawk soaring over, 4 Band-tailed Pigeon, 4 Anna's Hummingbird fighting over the feeder, a Downy Woodpecker, 2 Hairy Woodpecker, a Pileated Woodpecker, 3 Steller's Jay, 2 Black-capped Chickadee, 3 Chestnut-backed Chickadee, a Red-breasted Nuthatch, 2 Black-headed Grosbeak, 2 Spotted Towhee, a White-crowned Sparrow, 5 Dark-eyed Junco, 4 Purple Finch, and an American Goldfinch, for a total species count of 22.

Kriss Erickson's report from her home near the Everett waterfront listed 18 Black-capped Chickadee, 8 Chestnut-backed Chickadee, 2 Bewick's Wren, 23 Bushtit, 12 Western Gull, 8 American Robin, 8 House Finch, a Yellow Warbler, 2 Northern Flicker, 4 Anna's Hummingbird, 2 Broad-tailed Hummingbird, a Cedar Waxwing, 7 Dark-eyed Junco, 2 Varied Thrush, 2 Common Redpoll, 2 Red-breasted Nuthatch, and a Red-tailed Hawk, for a total species count of 22.

Reporting from Stanwood, Mary Sinker listed 11 American Goldfinch, 34 American Robin, 9 Anna's Hummingbird, 2 Bald Eagle, 22 Band-tailed Pigeon, 13

Black-capped Chickadee, 3 Black-headed Grosbeak, 2 Brown Creeper, 8 Chestnut-backed Chickadee, 43 Dark-eyed Junco, 5 Downy Woodpecker, 2 Eurasian-Collard Dove, a Great Blue Heron at the creek, Hairy Woodpecker, 7 Kinglet sp., 25 Mourning Dove, a Pileated Woodpecker, a Red-breasted Sapsucker, 4 Pine Siskin, 4 Red-winged Blackbird, 11 Spotted Towhee, 12 Steller's Jay, 2 Willow Flycatcher, 5 Wilson's Warbler, and 4 Winter Wren, for a total species count of 37.

Reporting from Everett, Maureen Schmitz's total species count of 24 included a Pileated Woodpecker, 2 Steller's Jay, 2 Bewick's Wren, 2 Black-capped Chickadee, a Nuthatch species, 3 Song Sparrow, 3 Band-tailed Pigeon, 15 European Starling, 3 Anna's Hummingbird, 5 House Finch, 5 American Goldfinch, 2 White-crowned Sparrow, 4 Western Tanager, 4 American Crow, 3 Dark-eyed Junco, a Bald Eagle in the yard, and 2 Caspian Tern flying over.

Walter Zandi's report from Monroe included a Pileated Woodpecker, 5 Steller's Jay, 7 American Robin, 6 Dark-eyed Junco, 3 Northern Flicker, 5 Anna's Hummingbird, 2 Black-capped Chickadee, 2 Spotted Towhee, a Song Sparrow, 4 Mourning Dove, 1 Pine Siskin, 2 Chestnut-backed Chickadee, 2 Red-breasted Nuthatch, 2 House Finch, 3 American Goldfinch, 2 Downy Woodpecker, a flock of Canada Goose flying overhead, and a Black-headed Grosbeak, for a total species count of 23.

My report from Marysville included 6 American Crow, 8 American Robin, 7 Black-capped Chickadee, 2 Black-headed Grosbeak, a Cooper's Hawk, 12 House Finch, 2 Downy Woodpecker, 2 Dark-eyed Junco, 4 Northern Flicker, an Olive-sided Flycatcher, 7 Spotted Towhee, a Red-breasted Nuthatch, 6 Violet-green Swallow, an Anna's Hummingbird, and a White-Crowned Sparrow, for a total species count of 21.

If you are interested in participating in our Backyard Bird Count, please email me at pricemara1@gmail.com or call my cell phone at 425-750-8125. 📍

Many people have served in paid and volunteer staff positions in Audubon Washington's state office. It has been located at times in Olympia and now Seattle.

I want you to meet two of our former leaders who moved on from Audubon Washington to continue their valuable work on behalf of our planet. Jeff Parsons and Nina Carter both recently retired from public service.

In this story, I want to introduce Nina to you. Jeff's story will appear next month.

Nina Carter

Nina was appointed by Governor Jay Inslee to be Director of the *Washington State Environment and Land Use Hearings Office* (ELUHO) from 2015 to 2021. Governor Christine Gregoire had earlier appointed her as a member of the Growth Management Hearings Board (GMHB) from 2009-2020. Nina was qualified to be on the board as a "land use administrative law judge" because she had served much earlier (1990-1994) as an Olympia City Council member.

Nina Carter and Allen Gibbs

Nina was the presiding officer who helped write the Growth Management Hearings Board decision better known as the "Hirst Decision" which was appealed, but subsequently upheld by the Washington State Supreme Court. Thanks to that decision, local governments must now plan for and know how much water is available as more people move to and live in Washington state. Prior to the Hirst Decision, local governments were relying on outdated regulations at the Department of

Ecology and not linking land-use decisions with accurate water resource information.

Before joining the GMHB, Nina was a member of the Black Hills Audubon Society. Fellow Black Hills volunteer Jean MacGregor urged her to apply in 2001 for the newly vacant policy position at Audubon Washington, then headquartered in Olympia. Many of us remember the state Audubon "Dream Legislative Lobbying Team," which included Nina, Heath Packard, Lisa Remlinger and Miguel Perez Gibson.

Thanks to their lobbying, a great accomplishment was having state government protect IBAs (Important Bird Areas). Christi Norman, Tim Cullinan, and Nina worked with chapter members across the state to identify IBAs and then to convince the legislature to pass a bill to allow the Department of Natural Resources to include IBAs in their Natural Area Preserves (see RCW 79.70.110) <https://app.leg.wa.gov/rcw/default.aspx?cite=79.70&full=true>

Born in the Philippines, Nina became a world traveler thanks to her US Navy family (doesn't exempt her from seasickness). Her early schooling was in Lucerne (Switzerland) and Los Angeles. She earned college degrees in political science and public administration at Evergreen State College. Nina and husband, Dr. Thomas B. Rainey, professor emeritus of Russian and Eurasian Studies at Evergreen State College, live near a pond with two red tabby cats, the Brothers Karamazov: Dima and Alyosha. Under strict supervision, they are not skilled at catching birds, usually enjoying the indoor environment.

Dominga Soliz

Nina's successor is Ms. Dominga Soliz, who was legal case manager for the Washington Department of Corrections, Office of Risk Management, where she managed a caseload of more than 600 claims and lawsuits. She earned her law degree from the University of California, Davis and her bachelor's degree from Evergreen State College. Ms. Soliz said of Nina, "Nina is a stalwart champion against climate change, and her legacy will be felt for generations in Washington."

Jeff Parsons

Next month we will have a story about Jeff Parsons, former executive director of Audubon Washington (1996-2002). He retired recently as Legislative Policy Director for the Puget Sound Partnership (2014-2021). ✍

About Pilchuck Audubon Society

The Pilchuck Audubon Profile, official newsletter of Pilchuck Audubon Society, is published monthly.

Pilchuck Audubon Society (PAS) is a grass-roots environmental organization with members throughout Snohomish County and Camano Island, Washington.

Our mission is to conserve and restore natural ecosystems, focusing on birds and other wildlife, for the benefit of the earth's biological diversity.

Through education, advocacy, and community activism, PAS is committed to bringing people closer to wildlife in order to build a deeper understanding of the powerful links between healthy ecosystems and human beings, and to encourage the involvement of our members in efforts to protect the habitat this wildlife depends upon for survival.

We serve as a local chapter of the National Audubon Society.

PAS is a 501(c)(3) tax-exempt, non-profit organization incorporated in the state of Washington.

Newsletter Submissions

Submit articles to newsletter@pilchuckaudubon.org or mail to 1429 Avenue D, PMB 198, Snohomish, WA 98290. Submissions must be received by the 21st of the month preceding publication. We reserve the right to edit.
